

CORIAN® SOLID SURFACE FDA COMPLIANCE

A. FDA Compliance

Corian® Solid Surface sheet, sinks, and lavatories have been determined to be in compliance with FDA regulation 21CFR177.1010 and are acceptable for use as food contact surfaces.

When discussing this compliance, understand that FDA does not “approve” materials. It develops and publishes guidelines for materials that manufacturers must adhere to in order to be “in compliance with” FDA guidelines.

This compliance assessment is made by legal counsel. DuPont submitted the necessary records to an independent law firm for assessment. Their evaluation showed Corian® Solid Surface to be “in compliance with the federal food, drug and cosmetic act and all applicable food additive regulations.”

Based on this compliance, Corian® Solid Surface will not contaminate food and is safe for food contact applications in both private or public situations.
