

# The Lion's Den Playroom at the Roswell Park Cancer Institute

Roswell Park Cancer Institute, Buffalo, New York

*Healthcare Design at the New Lion's Den Cancer Institute*

## **The Lion's Den at the Roswell Park Cancer Institute in Buffalo, NY**

This colorful state-of-the-art, interactive playroom for children and teens is the brainchild of Hall-of-Fame hockey player Pat LaFontaine, developed through his Companions in Courage Foundation.

The Lion's Den is a special place for kids to connect with family, friends, teachers and celebrities using the latest video and game technology, including video games, video conferencing, internet-ready computers and flat screen TVs.

DuPont™ Corian® solid surface is used throughout the Lion's Den on panels, chairs and custom tables, helping contribute to a fun, comfortable, healthy environment thanks to its color variety, smooth, virtually seamless appearance and the fact that it is a nonporous surface that doesn't support the growth of bacteria, making it easy to clean and maintain.

"I didn't realize the versatility of Corian® solid surface," said LaFontaine. "We're extremely excited about the partnership with DuPont™ Corian® and what this Lion's Den will mean to the kids and staff at Roswell."
