**Best In-Class
I.A.Q.
Performance**

SpectraTile is the only completely waterproof lay-in ceiling tile on the market. It is extruded PVC foam with a decoratively embossed surface texture. This all-plastic panel solves the problems of water damage and mold/mildew that traditional fiber-based lay-in panels experience.

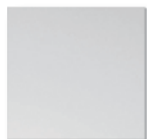

INSTALLATION

Use skill saw to cut to size and place Waterproof Ceiling Tiles into PVC or aluminum grid system. Optional clips may be used to clamp tiles down for uneven grid systems. To cut holes use a 1/2" diameter or larger hole saw to form radius corners. Waterproof Ceiling Tiles are nominally sized 2'x2' and 2'x4', but can also be trimmed using utility knife.

SPECTRATILE FEATURES

- Flame Retardant
- Scrubbable, Washable
- Will Not Flake, Break, Bow, Swell or Rot
- Fits any Standard Grid System
- Impact Damage Resistant
- USDA/CFIA Compliant
- Low Maintenance
- SpectraTile May Be Recycled As #3 Scrap

SpectraTile Applications: Public buildings, health care, schools, lodging, hospitality, offices & hallways, food & beverage, labs & operating rooms, swimming pools, kitchens, bathrooms, laundry and exterior enclosures.
